

# VMware AirWatch: Configure and Deploy Integrated Solutions

Duration 2 Days

## COURSE DESCRIPTION

This two-day course will provide you with the skills required to configure and provision VMware AirWatch® cloud deployments. It will cover the enablement of containerized applications, deployment and management of corporate email, and integration with enterprise resources. You will access hands-on labs and learn best practices for mobile deployment, with a focus on how to deploy and manage VMware AirWatch applications.

Students who complete this course and pass the accreditation exam may enroll in the VMware AirWatch: Install and Deploy On-Premise Solutions course.

VMware AirWatch: Configure and Deploy Integrated Solutions is also available as an On Demand course. For information on that course, follow this link: [VMware AirWatch: Configure and Deploy Integrated Solutions - On Demand](#).

### Product Alignment

- VMware AirWatch® Enterprise Mobility Management™
- VMware Workspace ONE® UEM

## COURSE OBJECTIVES

By the end of the course, you should be able to meet the following objectives:

- Configure and provision cloud deployments
- Learn VMware AirWatch best practices for mobile deployments
- Integrate with enterprise resources by installing VMware Enterprise Systems Connector™
- Enable containerized applications to securely connect with back-end resources through the VMware Unified Access Gateway™
- Deploy and manage corporate email through integration with Windows PowerShell or the AirWatch® Secure Email Gateway™

### Accreditations

This course prepares you for the following accreditation:

- VMware AirWatch Professional Accreditation: Enterprise Mobility

## COURSE OUTLINE

- Enterprise Systems Connector
- Integrate and Configure with Directory Services
- Secure Mobile Devices with Certificates
- Unified Access Gateway
- AirWatch Secure Email Gateway
- Windows PowerShell Configuration
- Integrating with Android Enterprise
- Enrollment Options for Mobile Device Management
- Create Web, Application, and Device Kiosks
- Reports, Analytics, and Telecom Management
- VMware Identity Manager Overview
- AppConfig Community

- AirWatch Content Locker Advanced
- Next Steps

### PREREQUISITES

This course requires completion of the following course:

- VMware AirWatch: Configure and Manage

### WHO SHOULD ATTEND

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers, and VMware AirWatch installers and implementation specialists
